

CAPTURE *the* FRACTURE®

A GLOBAL PROGRAMME TO BREAK THE FRAGILITY FRACTURE CYCLE

The International Osteoporosis Foundation has developed a global programme to facilitate the implementation of Fracture Liaison Services (FLS), a coordinated model of care for secondary fracture prevention. IOF believes this is the single most important thing that can be done to directly improve patient care and reduce spiraling fracture-related healthcare costs worldwide.

www.capturethefracture.org

Worldwide, there is a large care gap that is leaving millions of fracture patients at serious risk of future fractures. 'Capture the Fracture' hopes to close this gap and make secondary fracture prevention a reality.

Prof. John A. Kanis
PRESIDENT, IOF

THE KEY FACTS

- ▶ A prior fracture almost doubles a patient's future fracture risk.
- ▶ Half of patients presenting with hip fractures have suffered a prior fracture.
- ▶ The majority of fragility fracture patients are neither assessed, nor treated to reduce fracture risk.
- ▶ To achieve a significant reduction in future fracture rates and resulting health care costs, healthcare systems must target those patients who have already suffered a fracture, as they are the ones at highest risk for future fractures.
- ▶ Mortality increases up to 20-24% in the first year after a hip fracture.

THE PROVEN SOLUTION

Studies have shown that FLS models are the most cost-effective in preventing secondary fractures. This systematic approach to secondary fracture prevention, which includes a small investment in a fracture coordinator, can result in fewer fractures and significant cost savings to the healthcare system.

THE PROGRAMME

BE THE GLOBAL VOICE

- ▶ Raise awareness around secondary fracture prevention
- ▶ Have your local FLS network highlighted on the Map of Best Practice
- ▶ Presence at international and national conferences

ENSURE QUALITY

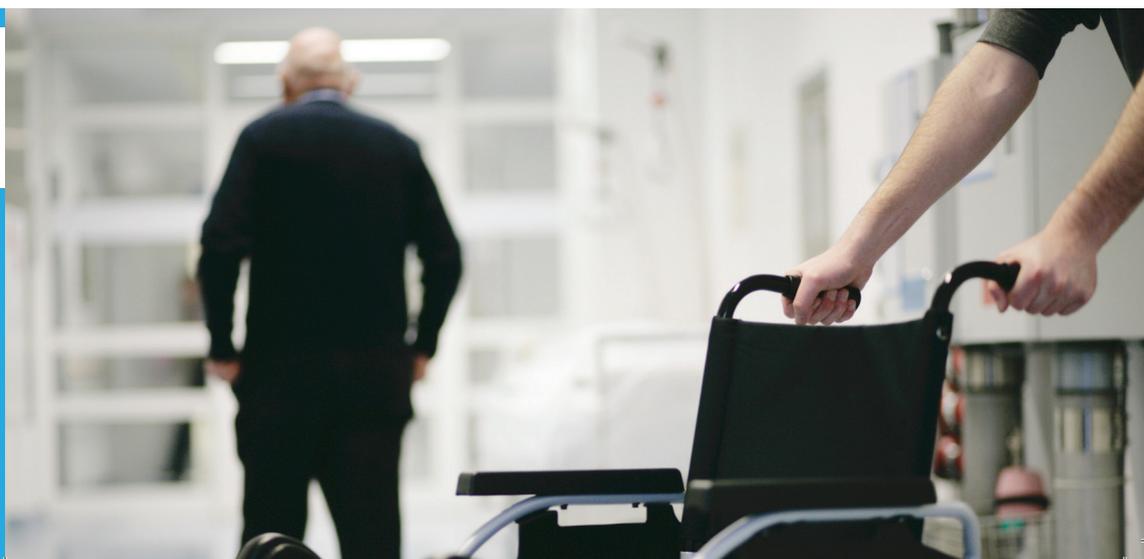

- ▶ Provide quality validation with the Best Practice Framework
- ▶ Best Practice Recognition programme: quality approved FLS network

PROVIDE SUPPORT

- ▶ Mentorship programme: on-site training days, workshops
- ▶ Webinars
- ▶ Toolkits, slide kits
- ▶ Scientific publications

DRIVE NATIONAL/INTERNATIONAL POLICY

- ▶ The Global Patient Charter

GET INVOLVED

GET MAPPED

Submit your FLS and gain visibility on our Map of Best Practice at: www.capturethefracture.org

JOIN US IN OUR EFFORTS TO CLOSE THE CARE GAP

Visit www.capturethefracture.org to:

FLS

Submit your FLS for Capture the Fracture® Best Practice Recognition and get mapped through the online application.

CNS, GET INVOLVED IN THE PROGRAMME

Join the programme to organize joint workshops within the mentorship programme, participate in webinars in your national language, help to drive signatures to the Global Patient Charter at a national level.

SIGN UP

Sign up to receive the Capture the Fracture® newsletter.

SIGN THE GLOBAL PATIENT CHARTER!
